 - Backend: Node.js, Express.js, MVC Architecture, RESTful API Development
 - Database: MongoDB, Mongoose (Schema Design, CRUD)
 - Tools & Security: Git, GitHub, Postman, JWT, Bcrypt.js, Dotenv, Axios
-

PROJECTS

GymManager (Full-Stack Web Application)

- **Backend Infrastructure:** Built a robust server-side using Node.js and Express.js, implementing MVC architecture for clean code separation and scalability.
 - **Authentication:** Developed secure user authentication using JSON Web Tokens (JWT) and password hashing with Bcrypt.js.
 - **Database Management:** Designed and implemented Mongoose schemas for Users and Admins, ensuring data integrity and efficient querying in MongoDB.
 - **Frontend Development:** Created a dynamic user interface with React.js, utilizing React Hooks (useState, useEffect) for state management.
 - **UI/UX:** Utilized Tailwind CSS to build a modern, mobile-responsive layout, focusing on high-performance rendering.
 - **API Testing:** Verified and documented all endpoints using Postman, ensuring seamless communication between the UI and server.
